

## - Clip H / HL -

### Characteristics :

Wheel holder made of steel – Recently developed by LIXON  
 Suitable for the Float industry , automotive glass and glass processing.  
 It fits perfectly on all cutting tables using usually the plastic “S” Clip such as BOTTERO cutting table or LISEC cutting table – Clip “HL”  
 High precision – Very tight tolerances

### Qualities & Diameters of the cutting wheels available on this clip :

- Supercarbolix - Diam 5,5 mm
- Titalix - Diam 5,2 mm & 4,2 mm
- Tantalix - Diam 5,5 mm & 4,2 mm

All other angles available on demand

### Advantages :

The Clip “H” and “HL” have exactly the same dimension than the plastic Clip S, so it is perfectly interchangeable  
 Clip H is an alternative to clip “S” and “BS”  
 Particularly efficient for thin or thick glass – Better control of the pressure  
 Straight or shape cutting  
 Colour code indicating the angle of the wheel  
 Excellent lubrication of the axle and the wheel – The rubber O’ring avoids the leaks  
 Good absorption of the vibrations thanks to this O’ring

### MODIFICATION AND DEVELOPMENT OF PILLARS POSTS
